The number of lines in a starburst effect depends on the number of aperture blades in your camera lens. An even number of blades produces the same number of starburst points, while an odd number of blades creates double that number of points. For example, a lens with 8 blades will have an 8-pointed starburst, and one with 9 blades will have an 18-pointed starburst.

# Two opportunities...

- **Ole' Photography Shared Interest Group**

(<https://qfam.org/OlePhotoSIG/index.htm>)

- Meets 2<sup>nd</sup> Monday of each month on Zoom to listen to speakers and share ideas.
- Has a closed Facebook group used to share and discuss images.
- Has an inhouse annual photography competition with selected images being shown at Jitter's coffee house in Eagle River during the month of December.

(<https://qfam.org/OlePhotoSIG/PhotoContest/index.htm>)

- **Alaska Photo Chat**

(<https://qfam.org/PhotoChat/>)

- An informal photography discussion group that meets once a week (Wednesdays, most of the time).
- The group grew out of the Ole Photo SIG but is not limited to Photo SIG members.
- A great place to raise your photography questions and get some answers.
- The website has records of a few tutorial sessions that the group has done.

# Assignment #7: Textiles (woven fabric/cloth)

- Create two captivating images that involve textiles as a focus of the composition. Images of the process of making textiles and the finished product make great images.
- The pictures must be taken between now and Sunday (11/9)
- Visit <https://qfam.org/PhotoAssign/> for how to upload the image
- Images due Sunday 9 November (or earlier!)
